

# **Quick Insight Summary – Student Performance Dashboard**

This Power BI Student Performance Dashboard provides a complete overview of student progress by combining academic scores, attendance tracking, and behavior monitoring in one interactive report.

Key insights include:

- 352 total students tracked across multiple classes and sections
- Attendance performance displayed as a percentage KPI for quick monitoring
- Average subject score analysis to identify strong and weak academic areas
- Behavior count and behavior-type breakdown to highlight discipline patterns
- Term-wise subject trends to compare performance changes over time
- Individual Student Profile page enables drill-through analysis for detailed reporting
- Mobile layout ensures accessibility and quick review on smaller devices

Overall, this dashboard supports educators in making data-driven decisions to improve student outcomes.
